

# Scionon® grafting tools

**ROELOFS**  
Tree nursery

## The Scionon® grafting tools are a new concept in how grafting can be approached.

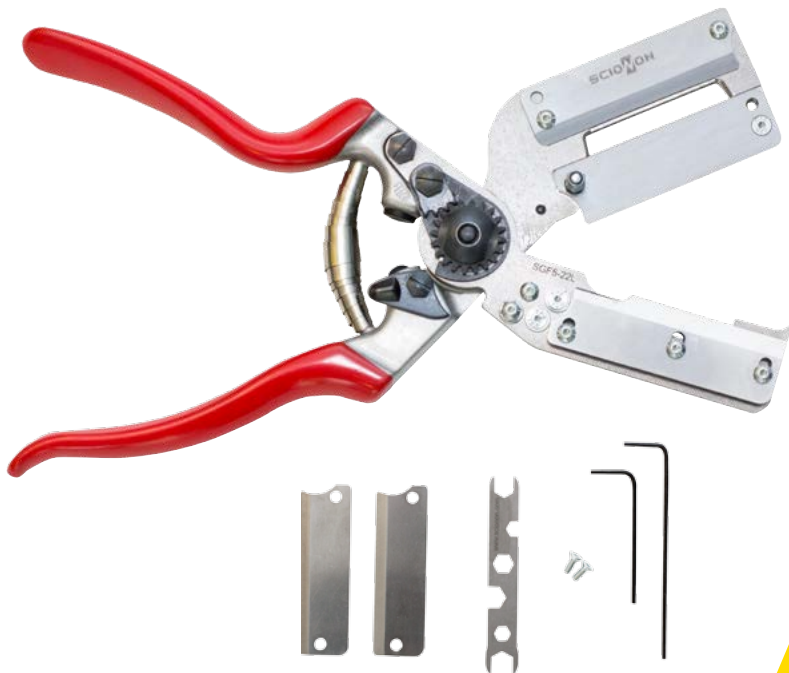

The hand held Grafting Shears and bench mountable Graft Crafter are unique in that they are capable of cutting 'whip & tongue' grafts and other grafts without the use of a knife. This tools enabling unskilled persons to prepare these technically difficult grafts with ease.

They are of extremely high and durable quality and are the only grafting tools available that successfully replicate the knife cut, thereby eliminating damage to the cambium layers when grafting.

They have been used to graft many fruiting and ornamental varieties and species.

Tree nursery Roelofs is distributor of Scionon® grafting tools in Europe since 2012.

# Scionon - complete GraftingSystems™ in your hands!

- ◆ Right & left handed versions available
